Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future

reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

1.2 ASX Announcement

Obsidian Options

On 1 November 2022, the Company announced it had entered into an agreement with New York based asset and fund manager Obsidian Global GP, LLC (**Obsidian**) to raise up to \$5,000,000 (before costs) via convertible notes (**Obsidian Agreement**). The convertible notes were to be issued in three separate tranches, comprising of:

- (a) **First Purchase:** \$1,750,000 worth of convertible notes to occur within 5 business days after the execution date of the Obsidian Agreement subject to certain conditions being satisfied;
- (b) **Second Purchase:** \$1,750,000 worth of convertible notes to occur 5 business days after to certain conditions being satisfied and shareholder approval; and
- (c) **Third Purchase:** \$1,500,000 worth of convertible notes upon the Company and Obsidian agreeing that the Third Purchase should occur and the date it shall occur on.

The Company issued 1,127,175 convertible notes, each with a face value of USD\$1.15, being the First Purchase, under the prospectus dated 28 November 2022 (**November Prospectus**). It was deemed that the First Purchase occurred on the 2 November 2022.

On 9 January 2023, the Company announced that it had secured \$500,000 under the Second Purchase via the issue of 340,850 convertible notes and agreed to issue 22,000,000 Options exercisable at \$0.25 on or before 2 November 2024 (**Obsidian Options**) as consideration for the Second Purchase. The reduction in size

for the Second Purchase was based on mutual agreement between the Company and Obsidian.

Pursuant to the notice of meeting dated 24 November 2022 (**November Notice**), the Company received Shareholder approval to issue the Obsidian Options to Obsidian. Refer to resolution 23 of the November Notice.

Further details in respect of the Obsidian Agreement are set out in the ASX Announcement dated 1 November 2022, November Prospectus and November Notice.

The Obsidian Options are being offered pursuant to this Prospectus. Further details in respect of the Obsidian Offer are set out in Section 2.1.

March Options

On 25 February 2022, the Company announced it had secured firm commitments from institutional, professional and sophisticated investors to raise \$5 million (before costs) through the issue of approximately 72.4 million new Shares at an issue price of \$0.069 per Share with one free attaching Option for every one new Share issued (**March Placement**). The March Placement included a commitment for participation for approximately \$318,250 from former Non-Executive Director, Mr Adam Blumenthal.

On 2 March 2022, the Company issued 67,851,467 Shares to participants in the March Placement at an issue price of \$0.069 per Share to raise approximately \$4,681,751 (subject to rounding) (**March Shares**).

The March Shares were issued pursuant to the Company's capacity under its Listing Rule 7.1A mandate, which was previously approved by Shareholders at the Company's annual general meeting held on 24 June 2021.

On 25 October 2022, the Company announced that it had become aware that Suburban Holdings Pty Ltd (**Suburban**), an entity controlled by the parent of former director, Mr Adam Blumenthal, had participated in the March Placement and had been issued 14,492,755 Shares (**Suburban Shares**). Pursuant to section 228 of the Corporations Act, a holding controlled by a parent of a director is deemed to be a related party of the Company. Therefore, Suburban's participation in the March Placement required prior Shareholder approval under Listing Rule 10.11 and constituted a breach of Listing Rule 10.11.

In accordance with the direction of ASX, Suburban has agreed to dispose of the Suburban Shares within six (6) weeks of the 25 October 2022. Any profit made on the disposal of the holding will be donated to an entity that is listed with the Australian Charities and Not-For-Profits Commission as a charity. Further details are set out in the ASX announcement dated 25 October 2022.

On 12 December 2022, the Company issued the participants under the March Placement one Option for every Share subscribed for and issued under the March Placement pursuant to its issue capacity under Listing Rule 7.1. The 53,358,712 Options are exercisable at \$0.14 each on or before the date that is 18 months after the date of issue. For the avoidance of doubt 14,492,755 Options were not issued to Suburban.

EverBlu Capital Pty Ltd (ACN 612 793 683) (**EverBlu Capital**) was engaged to lead manage the March Placement. In consideration for the provision of these services, the Company agreed to:

- (a) pay EverBlu Capital a capital raising and management fee of 6% of the funds raised under the Placement; and
- (b) subject to Shareholder approval being obtained, issue EverBlu Capital (or its nominee/s) up to 57,971,032 Options, being one Option for every one Option issued under the March Placement on the same terms and conditions as the March Placement.

Pursuant to the November Notice, the Company sought Shareholder approval pursuant to Listing Rule 10.11 for the issue of 4,612,320 Shares and 4,612,320 Options to former Director, Mr Adam Blumenthal (or his nominee/s), in respect of his participation in the March Placement. The securities issued to Mr Blumenthal will be on the same terms as the Shares and Options issued to non-related party participants in the March Placement.

On 29 December 2022, the Company received Shareholder approval to issue the 4,612,320 Shares and 4,612,320 Options to Mr Adam Blumenthal (or his nominee/s) and 57,971,032 Options to EverBlu Capital (or its nominee/s) under the March Placement.

On 25 January 2023, it was agreed that the \$318,250 committed by Mr Adam Blumenthal in the March Placement will be advanced to the Company by Mr Blumenthal (or one of his controlled entities) as an interest free unsecured loan and, subject to Shareholder approval at a future general meeting, will convert into 4,612,320 Shares and 4,612,320 Options (**Advance**). Mr Adam Blumenthal has not been issued the 4,612,320 Shares and will not be entitled to subscribe for the 4,612,320 Options until shareholder approval is obtained. The Advance is anticipated to be finalised within a week of lodging this Prospectus. Additionally, the 57,921,032 Options to be issued to EverBlu Capital will be reduced by 4,612,320 Options to 53,358,712 Options as a result of the Advance. The Company will seek Shareholder approval for the issue of the 4,612,320 Options at a future general meeting.

Accordingly, this Prospectus includes the offer of 53,358,712 Options under the March Placement to EverBlu Capital (**March Options**).

Further details in respect of proposed March Options issue are set out in the ASX announcement dated 25 February 2022 and November Prospectus.

The March Options are being offered pursuant to this Prospectus. Further details in respect of the March Offer are set out in Section 2.2.

August Options

As announced on 4 August 2022, the Company secured firm commitments from institutional, professional and sophisticated investors to raise \$7 million (before costs) through the issue of 175,000,000 Shares at an issue price of \$0.04 per Share (**August Placement**).

The August Placement included commitments from the following related parties:

- (a) \$1,440,000 from former Non-Executive Director, Mr Adam Blumenthal;
- (b) \$200,000 from Non-Executive Director, Mr Bruce Linton; and
- (c) \$100,000 from Chief Executive Officer and Managing Director, Mr William Lay,

(together, the **August Related Participants**).

On 8 August 2022 and 15 August 2022, 131,500,000 Shares were issued to participants in the August Placement who were not related parties of the Company (**August Unrelated Participants**).

The Company agreed, subject to receiving Shareholder approval, to issue the August Related Participants and August Unrelated Participants with one (1) free attaching Option for every Share subscribed for and issued under the August Placement. The Options will be exercisable at \$0.08 each on or before 31 January 2027 years after the date of issue. The Company intends to seek quotation of the Options, subject to meeting Listing Rule requirements.

EverBlu Capital was engaged as lead manager to the August Placement. In consideration of these services, the Company agreed to:

- (a) pay EverBlu Capital a capital raising and management fee of 6% of the funds raised under the August Placement; and
- (b) subject to Shareholder approval being obtained, issue EverBlu Capital (or its nominee/s) up to 175,000,000 Options, being one Option for every one Option issued under the August Placement on the same terms and conditions as the August Placement.

Pursuant to the November Notice, the Company sought Shareholder approval for the issue of:

- (a) 36,000,000 Options to Mr Adam Blumenthal (or his nominee/s);
- (b) 2,500,000 Options to William Lay (or his nominee/s);
- (c) 5,000,000 Options to Bruce Linton (or his nominee/s);

(together, the **August Options**).

On 29 December 2022, the Company received Shareholder approval for the issue of the August Options to the August Related Participants, August Unrelated Participants and EverBlu Capital (together, the **August Parties**).

As noted above, Mr Adam Blumenthal has committed \$1,440,000 towards the August Placement. Prior to the lodgement of this Prospectus, the Company received \$637,336 from Mr Adam Blumenthal and agreed that the remaining \$802,664 will be offset against the invoices for various services, including, but not limited to, monthly retainer fees, capital raising fees relating to both Obsidian funding events, capital raising fees related to the November secured convertible notes, capital raising fees related to director participation in the August Placement, reimbursement of travel, accommodation and legal fees as approved by the Company, sales taxes on relevant services, and out of scope fees, provided by EverBlu Capital.

(g) **Timing of issue of Shares on exercise**

- (ii) if required, give ASX a notice that complies with section 708A(5)(e) of the Corporations Act, or, if the Company is unable to issue such a notice, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors; and
- (iii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the New Options.

If a notice delivered under (g)(ii) for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company must, no later than 20 Business Days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors.

(h) **Shares issued on exercise**

Shares issued on exercise of the New Options will rank equally with the then issued shares of the Company.

There are no participation rights or entitlements inherent in the New Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the New Options without exercising the New Options.

(l) **Change in exercise price**

A New Option does not confer the right to a change in Exercise Price or a change in the number of underlying securities over which the New Option can be exercised.

(m) **Transferability**

The New Options are transferable subject to any restriction or escrow arrangements imposed by ASX or under applicable Australian securities laws and any further direction by the Board.

5. RISK FACTORS

5.1 Introduction

The Securities offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors consider the risk factors set out in this Section 5, together with all other information contained in this Prospectus.

The future performance of the Company and the value of the Securities may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 5, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities. This Section 5 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

Before determining whether to invest in the Company you should ensure that you have a sufficient understanding of the risks described in this Section 5 and all of the other information set out in this Prospectus and consider whether an investment in the Company is suitable for you, taking into account your objectives, financial situation and needs.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

5.2 Company specific

Risk Category	Risk
Potential for dilution	<p>The Company currently has 1,996,847,517 Shares on issue. As set out in this Prospectus, the company is intending to issue up to 425,358,712 New Options. No immediate dilution will occur as a result of the issue of New Options under this Prospectus. However subsequent exercise of any or all of the New Options will result in dilution. Assuming all New Options offered pursuant to this Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offers, are likely to be diluted by an aggregate of approximately 21.30% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).</p> <p>It is not possible to predict what the value of the Company, a Share or an Option will be following the completion of the Offers being implemented and the Directors do not make any representation as to such matters.</p> <p>The last trading price of Shares on ASX prior to the Prospectus being lodged of \$0.022 is not a reliable indicator as to the potential trading price of Shares after implementation of the Offers.</p>

Risk Category	Risk
<p>Additional requirements for capital</p>	<p>The Company's ability to effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities and to meet any unanticipated liabilities or expenses which the Company may incur may depend in part on its ability to raise additional funds.</p> <p>Depending on the Company's ability to generate income and revenue from its operations, the Company may require further financing in the future.</p> <p>The Board believes the Company will have sufficient working capital to adequately meet the Company's short-term creditor commitments as a result of the funds raised and funds generated through the Company's revenue streams.</p> <p>The Company is confident that it will be able to generate further funding as and when available. Additionally, the Company continuously explores merger and acquisition opportunities with a view to strengthening its existing businesses and/or divesting operations. Further, the Company continuously explores further product offerings and available market opportunities in line with its business strategies and objectives which may enable the Company access additional funding.</p> <p>Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its development and research programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.</p> <p>Further, the Company, in the ordinary course of its operations and developments, is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position.</p>
<p>Going Concern</p>	<p>The Company's financial report for the half year ended 30 June 2022 (Financial Report) included a statement that there was material uncertainty that casts significant doubt upon the Company's ability to continue as a going concern.</p> <p>The financial statements were still prepared on a going concern basis which contemplates continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business.</p> <p>The continuing viability of the Company and its ability to continue as a going concern and meet its debts and commitments as they fall due are dependent upon the Company being successful with the following factors:</p> <p>(a) the ability of the Company to raise additional funds from shareholders, new investors and debt markets. The Company has successfully conducted a number of capital raisings in recent years and since the half-year end has raised \$5.26m from equity issues, with a further</p>

Risk Category	Risk
	<p>\$1.74m to be received from Directors of the Company subject to shareholder approval. There is a reasonable expectation that additional sources of funding can be achieved;</p> <p>(b) increased revenue from opportunities with existing and new customers and sales arrangements as they are realised into sales revenue in the Company's Canadian, US and Switzerland operations; and</p> <p>(c) effective monitoring and, reduction of the Company's overhead expenditures, including the continued realisation of head office cost reductions.</p> <p>The Company believes it has sufficient liquidity and options available to prepare the financial statements on a going concern basis at this time.</p> <p>In the event that the Company is unable to achieve the matters detailed above, it may not be able to continue as a going concern and therefore the Company may not be able to realise its assets and extinguish its liabilities in the ordinary course of operations and at the amounts stated in the financial statements.</p>
<p>Coronavirus (COVID-19)</p>	<p>The coronavirus (COVID-19) is continuing to impact global markets, commodity prices and foreign exchange rates. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.</p> <p>The Directors are monitoring the situation closely and have considered the impact of COVID-19 on the Company's business and financial performance. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain. In compliance with its continuous disclosure obligations, the Company will continue to update the market regarding the impact of COVID-19 on its revenue channels and any other material adverse impacts on the Company.</p>
<p>Potential acquisition risk</p>	<p>As part of its business strategy, the Company continues to engage in the assessment and evaluation of new business and asset acquisition opportunities within the global cannabis sector and other similar sectors, such as psychedelics, as an organic extension of the Company's operations with a view to increasing the overall value of the Company. The Company may make acquisitions of, or significant investments in businesses and assets that are complementary to the Company's business. Any such future transactions are accompanied by the risks commonly encountered in making acquisitions of businesses and assets, such as integrating cultures and systems of operation, relocation of operations, short term strain on working capital requirements, achieving the sales and margins anticipated and retaining key staff and customer and supplier relationships.</p> <p>If the Company proceeds with such an acquisition, it will also be subject to risks associated with the business or asset being acquired, including, but not limited to legal risks, the risks associated that the negative aspects of the reputation of a business or asset which has been acquired will be applied to or</p>

Risk Category	Risk
	<p>associated with the relevant business of the Company and the regulatory risks associated with the business.</p> <p>To proceed with a future acquisition, the Company may be required to raise additional funds. There is no guarantee that at that time that the Company will be able to raise those funds on terms that are favourable to the Company, if at all. Alternatively, the Company may be required to issue securities in consideration for the acquisition, which may have a dilutive effect upon existing shareholders.</p>
Intellectual property rights	<p>The Company may be forced to litigate, to enforce or defend its intellectual property rights against infringement and unauthorised use by competitors, and to protect our trade secrets. In so doing, the Company's intellectual property may be put at risk of being invalidated, unenforceable, or limited or narrowed in scope. Further, an adverse result in any litigation or defence proceedings may place pending applications at risk of non-issuance. In addition, if any licensor fails to enforce or defend their intellectual property rights, this may adversely affect the Company's ability to develop and commercialise the Company's current and future products (Products) and prevent competitors from making, using, and selling competing products. Any such litigation could be very costly and could distract management from focusing on operating the Company's business. Further, because the content of much of the Company's intellectual property concerns cannabis and other activities that are not legal in some state jurisdictions, we may face additional difficulties in defending our intellectual property rights.</p>
Protection of proprietary technology	<p>The Company's success will depend, in part, on the Company's ability to obtain patents, protect trade secrets and operate without infringing on the proprietary rights of others. If the Company fails to adequately protect its intellectual property, it may face competition from companies who attempt to create a generic product to compete with the Products. The Company may also face competition from companies who develop a substantially similar product to one of the Products that is not covered by any protection.</p> <p>Many companies have encountered significant problems in protecting and enforcing intellectual property rights in foreign jurisdictions. Proceedings to enforce the Company's patent rights in foreign jurisdictions could result in substantial cost and divert our efforts and attention from other aspects of its business.</p>
Competition	<p>The cannabis and nutraceutical industries are highly competitive and subject to rapid change. The industries continue to expand and evolve as an increasing number of competitors and potential competitors enter the market. Many of these competitors and potential competitors have substantially greater financial, technological, managerial and research and development resources and experience than the Company. Some of these competitors and potential competitors have similar or more experience than the Company in the development of pharmaceutical products, including validation procedures and regulatory matters. In addition, the Products compete with, product offerings from large and well-established companies that have greater marketing and sales experience and capabilities than we or our future collaboration partners may have. If the Company is</p>

Risk Category	Risk
	unable to compete successfully, it may be unable to generate, grow and sustain its revenue.
Joint venture, partnerships or other strategic alliances	The Company may enter into strategic partnerships or alliances with third parties in order to enhance its business. Additionally, the Company continuously explores merger and acquisition opportunities with a view to strengthening its existing business and/or divesting non-core business operations. Any entry into, or commitment to, such relationship or opportunity will bring additional risks specifically contractual risks. The Company would also be likely to incur transactional costs in evaluating and negotiating such relationships which will need to be incurred regardless of whether the proposed transactions complete or bring benefit to the Company.

5.3 Risks relating to Products

Risk Category	Risk
Risk of generating public controversy	Some of the Products contain controlled substances and their regulatory approval may generate public controversy. Political and social pressures and adverse publicity could lead to delays in approval of, and increased expenses for the Products. These pressures could also limit or restrict the introduction and marketing of the Products. Adverse publicity from cannabis misuse or adverse side effects from cannabis or other cannabinoid products may adversely affect the commercial success or market penetration achievable by the Products and the operations of the Company. The nature of the Company's business attracts a high level of public and media interest, and in the event of any resultant adverse publicity, our reputation may be harmed.
Legal and Regulatory changes	<p>Achievement of the Company's business objectives is also contingent, in part, upon compliance with other regulatory requirements enacted by governmental authorities and obtaining required regulatory approvals all over the world. The regulatory regimes applicable to the cannabis business in the US, Canada, Australia, Colombia, Brazil, and the European Union are currently undergoing significant changes and the Company cannot predict the impact of the changes on its operations once the regulatory regimes are finalized.</p> <p>Any delays in obtaining, or failing to obtain, required regulatory approvals may significantly delay or impact the development of markets, products and sales initiatives and could have a material adverse effect on the business, results of operations and financial condition of the Company. The Company will incur ongoing costs and obligations related to regulatory compliance. Failure to comply with regulations may result in additional costs for corrective measures, penalties or restrictions on the Company's operations.</p> <p>In addition, changes in regulations, more vigorous enforcement thereof or other unanticipated events could require extensive changes to the Company's operations, increased compliance costs or give rise to material liabilities, which could have a material adverse effect on the business, results of operations and financial condition of the Company.</p>

Risk Category	Risk
<p>Controlled substance legislation may restrict or limit ability to develop and commercialise the Products</p>	<p>Most countries are parties to the Single Convention on Narcotic Drugs 1961, which governs international trade and domestic control of narcotic substances, including cannabis extracts. Countries may interpret and implement their treaty obligations in a way that creates a legal obstacle to our obtaining marketing approval for the Products in those countries. These countries may not be willing or able to amend or otherwise modify their laws and regulations to permit the Products to be marketed or achieving such amendments to the laws and regulations may take a prolonged period of time.</p>
<p>Product liability and uninsured risks</p>	<p>Through its intended business, the Company is exposed to potential product liability risks which are inherent in the research and development, manufacturing, marketing and use of its products or products developed with future co-development alliance partners. The Company may not be able to maintain insurance for product or service liability on reasonable terms in the future and, in addition, the Company's insurance may not be sufficient to cover large claims, or the insurer could disclaim coverage on claims.</p> <p>Although the Company endeavors to work to rigorous standards there is still the potential for the products to contain defects or fail to meet customer's agreed specification. These defects or problems could result in the loss of or delay in generating revenue, requirements to repay prepaid revenue, loss of market share, failure to achieve market acceptance, diversion of development resources, and damage to the Company's reputation or increased insurance costs.</p> <p>If the Company fails to meet its clients' expectations, the Company's reputation could suffer, and it could be liable for damages.</p> <p>Further, the Company is exposed to the risk of catastrophic loss to necessary laboratory equipment, computer equipment or other facilities which would have a serious impact on the Company's operations. The Company gives no assurance that all such risks will be adequately managed through its insurance policies to ensure that catastrophic loss does not have an adverse effect on its performance.</p>
<p>Customer and Contractual Risks</p>	<p>Partnering or distribution agreement are subject to the risk that the parties to these agreements will not adequately or fully comply with their respective contractual rights and obligations including the obligations to order minimum quantities or that these contractual relationships may be terminated. Any failure to meet these obligations or termination of contractual relationships may result in the need to replace products, loss of revenue or termination of existing agreements which may have a material adverse effect on the Company and its operations.</p>
<p>Access to active ingredients</p>	<p>Some of the Products will/do contain active cannabis or hemp derived ingredients from full plant extracts. The Company needs access to these materials. An inability to access these raw materials with the required specifications or quality could mean that some of the Products are compromised or delayed.</p> <p>The Company may, from time to time, enter into agreements with other suppliers of active cannabis or hemp derived ingredients. There is a risk that the Company may have protracted negotiations on commercial terms and this may result in delays in the development of the Company's products</p>

Risk Category	Risk
	and/or increase in the Company's costs of development and production.
Cultivation Risks	<p>Part of the Company's business involves the cultivation and growing of cannabis and/or hemp, which are agricultural products. As such the business may be subject to the risks inherent in the agricultural industry, such as insects, plant diseases, invasive plant species, storm, fire, frost, flood, drought, water availability, water salinity, pests, bird damage and force majeure events. In addition, significant interruptions or negative changes in the availability of economics of the supply chain for the raw material and supplies related to growing operations as well as electricity, water and other local utilities inputs could materially impact the business, financial condition and operating results of the Company.</p> <p>The Company's cultivation operations are subject to the licenses required and other applicable legislation and regulations enforced in those countries. Accordingly, the amount of cannabis and hemp the Company is able to produce may be capped and ultimately this will restrict the amount that the Company can sell, at least whilst no further legislation is in operation.</p>
Climate Change	<p>There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:</p> <p>(a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences; and</p> <p>(b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. These physical risks may have financial implications for the Company, such as indirect impacts from supply chain disruption and industry demand.</p> <p>All these risks associated with climate change may significantly change the industry in which the Company operates.</p>

5.4 General risks

Risk Category	Risk
Economic	General economic conditions, introduction of tax reform, new legislation, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's research and development programmes, as well as on its ability to fund those programmes.
Market conditions	<p>Share market conditions may affect the value of the Company's Securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:</p> <ul style="list-style-type: none"> (a) general economic outlook; (b) introduction of tax reform or other new legislation; (c) interest rates and inflation rates; (d) changes in investor sentiment toward particular market sectors; (e) the demand for, and supply of, capital; and (f) terrorism or other hostilities. <p>The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and cannabis stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p>
Reliance on key personnel	The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.
Unforeseen expenditure risk	Expenditure may need to be incurred that has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any such additional expenditure requirements, if such expenditure is subsequently incurred, this may adversely affect the expenditure proposals of the Company.
Dependence on outside parties	The Company may pursue a strategy that forms strategic business relationships with the other organisations for the manufacture and distribution of products and services. The manufacture and global distribution of products and services is important to the overall success of the Company. There can be no assurance that the Company will be able to attract such prospective organisations and to negotiate appropriate terms and conditions with these organisations.
Contractual risk	The Company's ability to efficiently conduct its operations in a number of respects depends upon a number of contracts. As in any contractual relationship, the ability for the Company to ultimately receive the benefit of the contract is dependent upon the relevant third party complying with its contractual obligations. To the extent that such third parties default in their obligations, it may be necessary for the Company to enforce its rights under any of the contracts and pursue legal action. Such legal action may be costly and no guarantee can be

Risk Category	Risk
	given by the Company that a legal remedy will ultimately be granted on appropriate terms.
Economic conditions and other global or national issues	<p>General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities.</p> <p>General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.</p>

5.5 Speculative investment
